

Is your home ready for winter?

Save energy and money with a FREE Home Energy Analysis

Choose the Home Energy Analysis (HEA) that's right for you

Free HEA

One of our friendly energy professionals will visit your home, analyze how you use energy, install energy-efficient products, and help you develop a plan to save more energy.

Advanced HEA with Building Diagnostics

Kick it up a notch with a home energy analysis that includes blower door testing and infrared thermal scans to identify air leaks and inadequate insulation. Homes that are drafty or experience frequent ice dams are good candidates for this more in-depth analysis (fee-for-service offering, \$100 to \$200 rebate available).

Minnesota Power customers Mary Kay and Marshall Thornton signed up for a home energy analysis and learned about lighting, appliances and simple changes in behavior that save energy.

Signing up is easy!

Visit www.mnpower.com/HEA to learn more and to sign up for a free HEA or view a list of participating contractors for the Advanced HEA with Building Diagnostics.

To participate, you must be a Minnesota Power residential customer.
