

Building a home in 2022?

Plan now to enjoy the benefits of electric heat

Peace of mind: Absence of combustion fuels for heating mitigates risks of carbon dioxide in the home.

Efficient: Air source heat pumps and ground source heat pumps provide an efficient way to heat and cool your home from one system.

Affordable: Get a reduced rate for electric heat with our Dual Fuel program.

Sustainable: The electricity you use to heat your home comes from an energy supply that is 50% renewable today. Our Energy-Forward vision is to deliver 100% carbon-free energy by 2050.

New Construction Energy Efficiency Program

AN ALLETE COMPANY

Knowledgeable. Trusted. Experienced.

One of our professional energy advisers will help you from start to finish to ensure your sustainable building goals and desired efficiency outcomes are met.
