Track your energy use and pay your bill online
- **Solar options**
Including our community solar garden
- **Information to help you save energy, save money**

Electric ride. Clean drive.

Take a few minutes to kick the tires on a new EV (electric vehicle) while you're at the **Arrowhead Home and Builders Show** April 4-8 in Duluth. We're parking one of the two all-electric Chevy Bolts we recently added to our fleet just across the aisle from our Power of One® conservation booth.

It costs less to operate and maintain an EV than a gasoline-powered vehicle.

EVs have zero tailpipe emissions and a smaller overall carbon footprint.

Reduces emissions that contribute to climate change and air pollution.

Learn more about electric vehicles, how to set up a charging location, and Minnesota Power's EV rate at www.mnpower.com/EV.
