

Why can't we get a consistent temperature in here?

Can I lower my heating costs and still be comfortable?

What would it take to put in air conditioning?

Who can I talk to about the right options for my home?

Get started with our heating and cooling guide »

When it comes to heating and cooling your home, there's no one-size-fits-all

Get our guide to help you understand your heating and cooling options

Every home is different and needs an individual plan to achieve the benefits of an efficient heating and cooling system. The first step is to understand your needs and learn about options that may be right for you. Our heating and cooling guide can give you information about your options, things to consider and tips for working with your contractor.

Check out the guide online or order a hard copy at www.mnpower.com/hvacGuide or by calling **218-355-2843** (opt. 1).

Take the next step to comfort, reliability and savings

Having a good contractor is key in making informed choices about your heating and cooling system. Contractors who participate in our programs can provide professional expertise and answer questions about your specific situation. These contractors stay up to date with certifications and trainings and are knowledgeable about Minnesota Power programs and rebates.

Visit www.mnpower.com/hvacContractors for a list of these program participating contractors.

Be sure to ask your contractor about Minnesota Power rebates and promotions.
