

**Did you know a dehumidifier  
can use as much energy  
as a standard refrigerator?!?**

Luckily, there are ways to save energy while  
keeping your home comfortable »

**Over 50% of Minnesota Power customers have dehumidifiers.\***

*Why?* Because we need them for the health of our homes.

Dehumidifiers are necessary to keep moisture at bay and ensure a comfortable and healthy home. Get the most for your dehumidifying dollar by choosing an ENERGY STAR® model and following simple energy-saving tips.

Find out ways to save energy by downloading our dehumidifying fact sheet at [www.mnpower.com/dehumidifiers](http://www.mnpower.com/dehumidifiers). Call **218-355-2843** (option 1) to learn about our energy conservation programs.

\*According to an online survey conducted from 2011 to 2014 by Minnesota Power and Direct Options.

*How can an **ENERGY STAR®** dehumidifier help you save energy?*

- A 40-pint ENERGY STAR-qualified dehumidifier can save roughly \$20 per year. This can add up to \$200 or more over the 10-year life of the unit. That's enough to pay for the dehumidifier!
- ENERGY STAR-qualified models have more efficient refrigeration coils, compressors and fans than conventional models, which means they use less energy to eliminate moisture.
- An ENERGY STAR-qualified model removes the same amount of moisture as a similar sized standard unit, but uses 15% less energy.
- Minnesota Power offers a \$10 rebate on ENERGY STAR models.
