

A standard dehumidifier uses HOW MUCH ENERGY?!

Choose ENERGY STAR® and save »

A standard dehumidifier uses about the same amount of energy as a refrigerator and clothes washer combined!

How can an ENERGY STAR® dehumidifier help you save energy?

- The annual energy saved by ENERGY STAR certified dehumidifiers could power your ENERGY STAR certified refrigerator for 3 months!
- ENERGY STAR qualified models have more efficient refrigeration coils, compressors and fans than conventional models, which means they use less energy to eliminate moisture.
- An ENERGY STAR qualified model removes the same amount of moisture as a similar sized standard unit, but uses 15% less energy.

Minnesota Power offers a \$10 rebate on ENERGY STAR models.
