

**Larry and Dave
could be coming to
your neighborhood.**

**Are you ready to
save energy?**

Meet Larry and Dave, energy professionals, nature enthusiasts, and all around good guys. If you'd like help developing an action plan for saving energy in your home, give them a call and ask for a **FREE Home Energy Analysis (HEA)** compliments of Minnesota Power's energy conservation program. With over 50 years of experience between the two, they'll recommend ways for you to save energy now and for the long run. As part of the analysis, they'll install energy-saving products and help you develop a customized plan to save energy.

"Many home energy audits are able to show customers how to make simple NO COST changes that result in huge energy savings."

Larry Johnson, LJ Weatherization

"Not all potential energy improvements are created equal. We evaluate the home and determine specific options for customers based upon their individual circumstances. Making informed choices empowers customers to get the most out of their investment, save energy and money, and benefit the environment."

Dave Lake, Northern Energetics

What Customers are saying about Minnesota Power's Home Energy Analysis

"Thank you very much for the energy audit performed at our home. The information you provided us was fantastic and very professional. We enjoyed your company and your excellent service and knowledge."

**Jay & Janine Fosle,
Minnesota Power customers**
